March 26, 2013

The Air Movement and Control Association, representing the world's largest manufacturers of fans, louvers and dampers, congratulates the organizers, sponsors and exhibitors of the China Refrigeration Show on 25 years of successful service to our industry. AMCA's mission is to advance the health, growth and integrity of our industry worldwide. Over 1/3 of our membership is in Asia, so naturally, the China Refrigeration Show is an important venue for meeting with our members, explaining our programs, and teaching attendees more about the how to address the complicated application and system design challenges that air movement and control systems involve.

AMCA promotes normalization of codes and standards worldwide, so our members can export designs that work in their local markets worldwide.

In China, AMCA membership has tripled in the last 4 years, driven by the need for credibility in domestic and foreign markets, and partnerships with peers outside China. AMCA's third party testing and Certified Ratings Program is often referred to as the "Passport to Export" in our industry.

AMCA's future in China and Asia is to serve the needs of our Chinese and Asian members. Today, we operate an accredited laboratory in Singapore, but as demand for our testing services grow, we hope to work with China based organizations to build a lab in China.

Every year, at The China Refrigeration Show, we come closer to our goals, and provide application engineering educational sessions to attendees. Thank you for all you do to facilitate this great industry, and congratulations once again on 25 years of service to our industry.

Wade W. Smith
Executive Director
