The International Authority on Air System Components

May 1, 2009

AMCA International Engineering Conference – 2010

The next AMCA International Engineering Conference is scheduled to be held February 28 - March 2, 2010. This conference will be held in San Antonio, TX, in conjunction with the AMCA International Sales and Marketing Executives Council Meeting, the HR/ME Council Meetings, the spring HVAC/Fire & Smoke Damper Engineering Committee meetings and the AMCA/UL Meeting.

Member companies are encouraged to be represented. Newer engineers and senior engineers alike will benefit from hearing the latest on what is going on in our industry. There will be some outside papers as well as those presented by AMCA International Engineers.

CALL FOR PAPERS

AMCA International Engineers and other experts in the industry are invited to submit a paper for presentation at the 2010 AMCA International Engineering Conference. A paper should be designed for a presentation length of approximately 50 minutes. Please submit an abstract consisting of one page, maximum, for review by the AMCA Engineering Standards Committee. Although any technical topic in the industry will be acceptable, particular attention will be afforded papers describing efforts to assist in improving the environment we live in. Papers describing real world problems and solutions have always been favorites in the past. Each presentation may be supported by visual aids (PowerPoint or overheads preferred); support may be included with the abstract if desired.

All abstracts should be submitted by July 31, 2009. Final papers and presentation material will be due December 1, 2009.

Abstracts should be sent to:

Engineering Conference 2010
AMCA International, Inc.
30 West University Drive
Arlington Heights, IL 60004-1893 U.S.A.

or e-mailed to Joe Brooks, Director of Engineering, at jbrooks@amca.org.

#####

The Air Movement and Control Association International, Inc. is a not-for-profit international association of the world's manufacturers of related air system equipment — primarily, but not limited to fans, louvers, dampers, air curtains, airflow measurement stations, acoustic attenuators, and other air system components for the industrial, commercial, and residential markets.

The association's mission is to promote the health and growth of the industries covered by its scope and the members of the association consistent with the interests of the public. AMCA International, with origins dating back to 1917, has members in most industrialized countries throughout the world.
