TIMOTHY D. KUSKI RECEIVES AMCA INTERNATIONAL DISTINGUISHED SERVICE AWARD

ARLINGTON HEIGHTS, Ill., October 16, 2017 — During its 2017 Annual Meeting, held Sept. 28 to Oct. 1 in Stowe, Vt., Air Movement and Control Association (AMCA) International Inc. announced Timothy D. Kuski, retired director of product education, Greenheck, Schofield, Wis., as a recipient of its Distinguished Service Award.

Since 2004, the AMCA Distinguished Service Award has been given to individuals who, through their character and career achievements, are exemplars of the mission of AMCA International: "to advance the health, growth, and integrity of the air-movement-and-control industry consistent with the interests of the public."

Kuski spent the last 34 years of his career with Greenheck. As director of product education, he managed a facility focused on educating engineers and contractors on various HVAC-related subjects. Prior to that, he served as director of research and development and, before that, as general manager and engineering manager for the Centrifugal, Vane Axial and Industrial business unit. As a product-development engineer, he was involved in the design of centrifugal, vane-axial, and mixed-flow fans.

Kuski, who holds a bachelor's degree in mechanical engineering from the University of Wisconsin–Madison, is a member of AMCA, ASME, and ASHRAE and is involved in various technical committees focused on fan performance, sound, and vibration. He is past chair of the AMCA Product Efficiency Task Force, which worked with the U.S. Department of Energy on regulation of fan efficiency for commercial and industrial applications.

Kuski and his wife of 36 years, Jeanne, are the parents of Craig, 28, a product specialist in the Ceiling and Inline business unit of Greenheck, and Maggie, 25, who works in community services for Children's Hospital of Wisconsin. He enjoys hunting, fishing, boating, and camping.

About AMCA International

Air Movement and Control Association (AMCA) International Inc. is a not-for-profit trade association with more than 370 member companies worldwide representing more than \$3 billion in annual revenue. AMCA's mission is to advance the health, growth, and integrity of the air-movement-and-control industry, with programs such as certified ratings,

*verification of compliance, and international standards development. AMCA also advocates for model codes, regulations, and utility incentive programs promoting efficiency and life safety. **For more information about AMCA, visit www.amca.org.***
