AMCA INTERNATIONAL SEEKS MANAGER OF NORTH AMERICA ADVOCACY PROGRAMS

ARLINGTON HEIGHTS, Ill., August 13, 2018 – Air Movement and Control Association (AMCA) International Inc. is seeking candidates for the new position of advocacy manager for North America. This is a leadership opportunity for a mid-career professional looking to make an impact with respect to the comfort, health, safety, energy efficiency, and construction quality of North America's building stock.

The advocacy manager will collaborate with AMCA staff members and committees and represent the association at hearings and meetings held by federal, state, municipal, and other relevant bodies.

Candidates must have heating, ventilation, and air-conditioning (HVAC) or building-construction experience and a working knowledge of energy, construction, and fire-safety codes and standards.

This is a report-at-office position, so candidates must live within commuting distance of Arlington Heights, Illinois.

Qualifications

- Four-year engineering, science, or technical degree from an ABET-accredited college or university.
- Five years of experience in HVAC design, HVAC application engineering, commissioning, codes/standards, construction, or similar.
- Excellent public-speaking skills.
- Demonstrated organizational and project-management skills.
- Working knowledge of model energy, construction, and fire-safety codes and standards.
- Expertise with Microsoft Office software.
- Ability to perform research and write concise reports providing insights and recommendations.
- Desired, but not required, is experience serving as a member of a code or standard committee and/or participating in a code- or standard-update cycle.

To be considered for this position, submit your resume and samples of your writing to Michael Ivanovich, senior director of industry relations, at mivanovich@amca.org.

Writing Samples

- Submit three or four writing samples as separate PDF files.
- Provide context for each writing sample in your e-mail message.
- Writing samples can be reports, analyses, technical papers, and/or journal articles.

About AMCA International

Air Movement and Control Association (AMCA) International Inc. is a not-for-profit association of manufacturers of fans, dampers, louvers, air curtains, and other air-system products for commercial facilities and industrial processes.

Headquartered in Arlington Heights, Ill., with offices in Brussels, Dubai, and Malaysia, AMCA has more than 380 member firms worldwide. Among its most important programs is the AMCA Certified Ratings Program, which covers more than 4,000 products from nearly 275 manufacturers. Its other services include verification of compliance, development of standards, and advocacy for model codes, regulations, and utility incentive programs promoting efficiency and life safety.

AMCA has its own testing and research laboratory and a network of affiliated independent laboratories in France, Malaysia, Korea, and Dubai.

AMCA participates in ASHRAE, International Organization for Standardization, UL, National Fire Protection Association, International Code Council, and International Association of Plumbing and Mechanical Officials codes and standards committees and cycles. Also, it represents member and industry interests in federal, state, county, and municipal regulatory initiatives.
