AMCA INTERNATIONAL SEEKS AMCA STANDARD 204 COMMITTEE MEMBERS

ARLINGTON HEIGHTS, Ill., Jan 8, 2018—Air Movement and Control Association (AMCA) International Inc. announced it is seeking technical committee members for the revision of AMCA Standard 204—*Balance Quality and Vibration Levels for Fans*.

The standard addresses the subjects of fan balance and vibration. It is part of a series of standards and publications listed in Annex E that cover important aspects related to the design, manufacture and use of fans. The purpose of this standard is to define appropriate fan balance quality and operating vibration levels to individuals who specify, manufacture, use, and maintain fans.

The scope of Standard 204 covers fans with rigid rotors, generally found in commercial heating, ventilating and air conditioning; industrial process applications; mine/tunnel ventilation applications, and power generation applications. Other applications are not specifically excluded, except as follows: Excluded are installations that involve severe forces, impacts, or extreme temperature acting on the fan.

Committee members would be expected to participate in the drafting, review and resolution of all comments on the standard until the revised standard is approved by the membership. Most (possibly all) meetings will be by conference call via GoToMeeting.

For more information regarding this publication or to volunteer for this committee, please complete the commitment form at: https://www.cognitofirms.com/AMCA1/_204TechnicalCommitteeInvitation142018 or contact Erin Moore at emoore@amca.org or +1 (847) 704-6285.

The invitation will close on February 4, 2018.

About AMCA International

The Air Movement and Control Association (AMCA) International Inc. is a not-for-profit trade association with more than 370 member companies worldwide representing more than \$3 billion in annual revenue. AMCA's mission is to advance the health, growth and integrity of the air movement and control industry, with programs like certified ratings, verification of compliance and international standard development. AMCA also advocates for model codes, regulations and utility incentive programs that promote efficiency and life safety. For more information about AMCA, visit www.amca.org.
