## AMCA INTERNATIONAL SEEKS AMCA STANDARD 500-L COMMITTEE MEMBERS

ARLINGTON HEIGHTS, Ill., Feb. 6, 2017 - The Air Movement and Control Association (AMCA) International Inc. announced it is seeking technical committee members for the revision of AMCA Standard 500-L, *Laboratory Methods of Testing Louvers for Rating*.

AMCA Standard 500-L covers the performance testing of louvers. The standard establishes uniform laboratory test methods for louvers. The characteristics to be determined include, as appropriate, air leakage, pressure drop, water penetration, wind driven rain, wind driven sand and operational torque.

Committee members would be expected to participate in the drafting, review and resolution of any and all comments on the standard until the revised standard is approved by the membership. Most (possibly all) meetings will be by conference call via GoToMeeting.

For more information regarding this publication or to volunteer for this committee, please contact Erin Moore at [emoore@amca.org](mailto:emoore@amca.org) or +1 (847) 704-6285 by March 6, 2016.

---

### **About AMCA International**

*The Air Movement and Control Association (AMCA) International Inc. is a not-for-profit trade association with more than 370 member companies worldwide representing more than \$3 billion in annual revenue. AMCA's mission is to advance the health, growth and integrity of the air movement and control industry, with programs like certified ratings, verification of compliance and international standard development. AMCA also advocates for model codes, regulations and utility incentive programs that promote efficiency and life safety. For more information about AMCA, visit [www.amca.org](http://www.amca.org).*
