## AMCA INTERNATIONAL SEEKS AMCA STANDARD 260 COMMITTEE MEMBERS

ARLINGTON HEIGHTS, Ill., Aug 30, 2018—Air Movement and Control Association (AMCA) International Inc. announced it is seeking technical committee members for the revision of BSR/AMCA Standard 260—*Laboratory Methods of Testing Induced Flow Fans for Rating*

This standard will establish a uniform laboratory method for determining an induced flow fan's aerodynamic performance in terms of airflow rate, pressure developed, power consumption, air density, speed of rotation and efficiency.

This standard is an adjunct to ANSI/AMCA210 in order to accommodate the induced flow fan's unique characteristics.

Committee members would be expected to participate in the drafting, review, and resolution of all comments on the standard until the revised standard is approved by the membership. Most (possibly all) meetings will be by conference call via GoToMeeting.

For more information regarding this publication or to volunteer for this committee, please complete the commitment form at: <https://www.cognitoforms.com/AMCA1/260TechnicalCommitteeInvitation8292018> or contact Erin Moore at [emoore@amca.org](mailto:emoore@amca.org) or +1 (847) 704-6285.

The invitation will close on September 29, 2018.

---

### **About AMCA International**

*The Air Movement and Control Association (AMCA) International Inc. is a not-for-profit trade association with more than 370 member companies worldwide representing more than \$3 billion in annual revenue. AMCA's mission is to advance the health, growth and integrity of the air movement and control industry, with programs like certified ratings, verification of compliance and international standard development. AMCA also advocates for model codes, regulations and utility incentive programs that promote efficiency and life safety. For more information about AMCA, visit [www.amca.org](http://www.amca.org).*
