## AMCA PUBLISHES ADVOCACY BRIEF ON NEW FAN ENERGY INDEX (FEI) METRIC

ARLINGTON HEIGHTS, Ill., April 8, 2019—With fan energy index (FEI) beginning to replace fan efficiency grade (FEG) as the metric used for fan-efficiency provisions in model and state energy codes and standards, Air Movement and Control Association (AMCA) International Inc. announces the publication of *AMCA Advocacy Brief, Fan Energy Index*, a multimedia document aimed at code officials and others considering proposals to convert FEG provisions to FEI.

Produced in partnership with Colorado State University (CSU) Online, *AMCA Advocacy Brief, Fan Energy Index* is a digital brochure with live links and an embedded video. It provides a nontechnical description of FEI and its benefits, explains the origins of FEI, highlights inroads FEI is making, and more.

To view *AMCA Advocacy Brief, Fan Energy Index*, go to [http://bit.ly/Advocacy\\_FEI](http://bit.ly/Advocacy_FEI).

AMCA and CSU Online will be collaborating on advocacy briefs on other topics of importance to the air-systems industry as well as online educational modules.

### **About AMCA International**

*Air Movement and Control Association (AMCA) International Inc. is a not-for-profit association of manufacturers of fans, dampers, louvers, air curtains, and other air-system components for commercial HVAC, industrial-process, and power-generation applications. With programs such as certified ratings, laboratory accreditation, verification of compliance, and international standards development, its mission is to advance the knowledge of air systems and uphold industry integrity on behalf of AMCA members worldwide. For more information about AMCA, visit [www.amca.org](http://www.amca.org).*
