## AMCA INTERNATIONAL ANNOUNCES CALL FOR VOLUNTEERS TO SERVE ON AMCA STANDARD 550 COMMITTEE

ARLINGTON HEIGHTS, Ill., October 9, 2018—Air Movement and Control Association (AMCA) International Inc. announced a call for volunteers to serve on a committee for AMCA Standard 550—*Test Method for High Velocity Wind Driven Rain Resistant Louvers*.

The purpose of the standard is to establish uniform laboratory test methods and minimum performance ratings for water rejection capabilities of louvers intended to be used in high velocity wind conditions.

The scope of the committee's task is to establish requisite parameters for successfully conducting these tests. Tests conducted in accordance with the requirements of this standard are intended to demonstrate the acceptability of the louver in which water infiltration must be kept to manageable amounts during a high velocity wind driven rain event.

The link to the invitation is below. The invitation will close on November 4, 2018.
