Air Movement and Control Association Certifies 4,000th Product

ARLINGTON HEIGHTS, IL, June 21, 2018—A milestone more than 75 years in the making, 4,000 air-system products from around the world now have been certified through Air Movement and Control Association (AMCA) International's Certified Ratings Program (CRP).

AMCA International certifies 24 types of air-movement and control products, including fans, dampers, louvers, air curtains, airflow-measurement devices, and ducts, through its CRP. Each product is series-produced, meaning designed and fabricated for general-purpose installations in commercial, industrial, and residential facilities.

Certification through the AMCA Certified Ratings Program is assurance a product line has been tested and rated in conformance with AMCA International's test standards and rating requirements and that published performance ratings are accurate.

The AMCA CRP was developed during the 1930s in response to the need for validated published performance ratings for air-movement and control devices. Today, more than 275 manufacturers in 30 countries around the world are enrolled in the AMCA CRP.

"The Certified Ratings Program has grown steadily since its inception," Mark Stevens, AMCA International executive director, said. "Over the last five years, the number of manufacturers with certified products has increased by more than 33 percent, while the total number of certified products has increased by more than 23 percent. We are very proud of surpassing 4,000 products. It is a significant milestone for the association and our members."

Only after a product has been tested and the cataloged ratings approved will an AMCA CRP seal be issued. AMCA CRP seals are affixed to equipment and used in catalogs and sizing/selection software in accordance with procedures set forth in AMCA Certified Ratings Program publications, such as AMCA Publication 211, *Certified Ratings Program Product Rating Manual for Fan Air Performance*. The seals help to inform specification and purchase decisions.

AMCA recently launched the AMCA Spec Check™ mobile app to aid the identification and research of Certified Ratings Program ratings and products. The app is available in the Apple Store and Google Play for iOS- and Android-based phones.

For more information regarding the AMCA Certified Ratings Program, visit <http://amca.org/whitepapers>, or contact Robb Clawson, AMCA Associate Director, Marketing and Communications, at rclawson@amca.org or +1 (847) 704-6325.
