## **AMCA LAUNCHES MICROSITE DEDICATED TO NEW FAN ENERGY INDEX (FEI) METRIC**

ARLINGTON HEIGHTS, Ill., November 14, 2018—Air Movement and Control Association (AMCA) International Inc. announces the launch of a microsite dedicated to educating the buildings industry about fan energy index (FEI) and supporting use of the metric in efforts to save energy, reduce operating costs, and accelerate decarbonization.

Developed by AMCA and member companies to support fan-efficiency codes, standards, regulations, and rebate programs, FEI is a wire-to-air, design-point metric emphasizing compliant fan selections based on operating points. It can be used by application and design engineers in sizing and selecting fan systems for commercial and industrial applications.

The microsite, located at <https://amca.org/fei> contains deep links to applicable standards, peer-reviewed technical papers and presentations, regulatory dockets, and online training modules.

#### ***About AMCA International***

*Air Movement and Control Association (AMCA) International Inc. is a not-for-profit association of manufacturers of fans, dampers, louvers, air curtains, and other air-system components for commercial HVAC, industrial-process, and power-generation applications. With programs such as certified ratings, laboratory accreditation, verification of compliance, and international standards development, the association's mission is to advance the knowledge of air systems and uphold industry integrity on behalf of AMCA members worldwide. For more information about AMCA, visit [www.amca.org](http://www.amca.org).*
